

Multiple 4-bands Mobile Ant. for 29/50/144/430MHz**Features:**

- * You can enjoy Quan-bands communication without changing the antenna to others.
- * 50/144/430MHz are wide bands, which requires No tuning works.
- * 29MHz can be tuneable by adjusting the top element, according to the mount location.

Specifications:

Frequency : 29.00-29.70MHz
 51.00-52.00MHz
 144.00-146.00MHz
 430.00-440.00MHz

Type & Gain:

29/50MHz - 1/4 0dBi
 144MHz - 1/2 2.15dBi
 430MHz - 5/8x2 5.5dBi

V. SWR : Less than 1 : 1.5

Impedance : 50 ohm

Max Power : 29/50MHz - 80W/FM

144/430MHz - 100W/FM

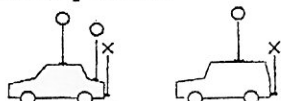

Connector : PL-259(M) type

Length : 1,190mm

Weight : 390g approx.

Mounting Works:

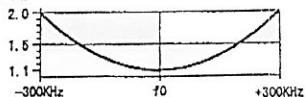

- * Referring to the below pictures, please decide the mounting location.

- * For the frequencies 29/50MHz, sufficient grounding to the car body is required. Otherwise, it may not be so easy to find out good SWR.

V. SWR Characters:

29MHz

50MHz
