

Talk Power For Peanuts.

HL-1K/A Kilowatt Tabletop HF Amplifier

Improve your peanut-whistle with some talk power from THL. Really good signals can be had with modest power and antenna set-ups and the FCC says that really high power is not necessary in most cases. That is good news for the HL-1K/A since the output (500W PEP) appears to be in line with their thinking. The HL-1K/A is type accepted by the FCC for use in the U.S. amateur bands. Solid construction (using reliable ceramic tetrodes with a proven track record) and compact size fit in almost anyone's budget and available space. Write Encomm today for the full details.
